**Subject:** Comments from Industry Stakeholders

Hi Laura, Allen, and Ken,

I wanted to give you a heads up that we have heard from two refineries and Mike Carroll that U.S. EPA has said that we cannot exit any facilities from RECLAIM until the landing rules have been fully implemented. Initially this comment was referenced as they heard a "rumor." At our Stationary Source Committee on Friday, Mike Carroll seemed more definitive in his comments.

Mike's comments are on the You Tube video at: 40 minutes

[South Coast AQMD Stationary Source Committee Meeting - March 19, 2021 - YouTube](#)

South Coast AQMD staff has had a brief discussion with U.S. EPA of "bridge" requirements to ensure as we exit facilities that there are BARCT requirements. However, I did not think there were any definitive recommendations from U.S. EPA on this issue.

I will ask Jacob to set up a meeting so we can discuss. No response to this email is needed. I just wanted to give you a heads up so you know why we are scheduling the meeting.

Thank you,  
Susan
